

PADMARAJU KIRAN KUMAR RAJU

Bangalore, Karnataka | Ph No: +91 6281122580 | kirankumarrajupadmaraju@gmail.com
<http://www.linkedin.com/in/padmarajukirankumarraju> | <https://github.com/Kiranraju628>

CAREER OBJECTIVE

To leverage my expertise in programming, data engineering, and Agentic AI to design scalable intelligent systems and streamline workflows. I aim to contribute to innovative and impactful projects in a collaborative environment by developing AI-driven solutions, optimizing data pipelines, and enhancing system performance. Passionate about Retrieval-Augmented Generation (RAG), AI automation, and data-driven decision-making, I am eager to expand my skills in generative AI, and emerging technologies.

EDUCATION

Sri Venkateswara College of Engineering & Technology Chittoor, AP
Bachelor of Technology, Computer Science Engineering, CGPA: 8.91/10.0 Oct 2021 – May 2025

A P Model Junior College Rayachoty, AP
Intermediate Education, MPC, Marks: 874/1000 Jun 2019 – Mar 2021

A P Model School Rayachoty, AP
Secondary School of Education, GPA: 9.2/10.0 Jun 2018 – Mar 2019

SKILL SET

Programming Languages : Python
Database Management : MySQL, PostgreSQL
Web Technologies : HTML, CSS, JavaScript
ETL & Integration Tools : Airbyte
Application Servers : DOCKER
Version Control : Git, GitHub
Productivity & Analytical Tools : Power BI, MS Excel, MS Word, PowerPoint
Generative AI & (LLMs) : OpenAI GPT, GROQ AI, Claude, Google Gemini, Copilot, Perplexity AI
Soft Skills : Adaptability, Time Management, Teamwork, Analytical Thinking, Communication & Collaboration

INTERNSHIPS

UNITSDB

Full Stack Engineer – AI Solutions Nov 2025 – Feb 2026
AI Chatbot Platform

- Built an AI chatbot using GROQ API and Vector DB with complete frontend and backend implementation.
- Implemented semantic search and context retrieval for intelligent responses.

Christian Matrimony AI RAG System

- Developed AI-powered profile ingestion and matchmaking features.
- Implemented chat-based and search-based intent handling for better user interaction and recommendations.
- Worked closely with cross-functional teams to deliver AI-based customer engagement solutions.

LEAF CRAFT

AIML Intern Jul 2025 – Oct 2025

- Built an **Project Co-Ordinator Swarm (AI-powered Meeting Agent)** to automate the full meeting workflow including attendance tracking, summarization, and task management.
- Implemented a **Summarizer module** using LLMs to generate structured meeting reports containing concise overviews, action items, and meeting outlines in PDF format.
- Developed an **Excel Generator** to transform meeting transcripts into well-organized Excel sheets capturing project details, tasks, priorities, and assignees.
- Integrated with **Jira via REST APIs** to automatically create projects, assign tasks, set priorities, and add comments based on meeting discussions.
- Used Python, OpenAI APIs, Google Meet APIs, and automation scripts to deliver end-to-end meeting productivity solutions.

BLACKBUCKS - IIDT

AI-ML-DS Intern May 2024 - Jul 2024

- Worked on practical projects involving data analysis, model development and algorithm optimization.
- Developed a Rainfall Prediction model using Python and Machine learning algorithms with a focus on data preprocessing.

INDO EURO SYNCHRONIZATION

Data Science Intern

Apr 2023 - Sep 2023

- Completed a data science internship, gained hands-on experience in data analysis, data visualization, machine learning, and statistical modelling, while working on real-world projects to derive actionable insights from complex datasets.

PROJECTS

GENERATION & DETECTION OF FACE MORPHING ATTACKS USING DEEP LEARNING

Apr 2025

- Developed a deep learning-based system to generate and detect face morphing attacks using CNN architectures, enhancing facial authentication security through image processing and classification techniques.
- Used Python and OpenCV for image handling and built a classification model to identify morphing attempts, demonstrating understanding of AI fundamentals and practical problem-solving skills.
- Overall, the project seeks to enhance the reliability and security of facial recognition systems against potential fraud and identity theft.

CERTIFICATIONS AND COURSES

- | | |
|--|-----------------|
| • GenAI Job Simulation, BCG X - | Jul 2025 |
| • GenAI Powered Data Analytics Job Simulation, TATA - | Jul 2025 |
| • Data Analytics Job Simulation Certification, Deloitte - | Jun 2025 |
| • Python for Data Science, IBM - | Jun 2025 |
| • Advanced Microsoft Power BI Certification, Edureka - | May 2025 |
| • The Complete Hands-on Introduction to Airbyte, Udemy - | Mar 2025 |
| • Introduction to Data Science Certification, Infosys Springboard - | Jun 2023 |
| • Azure Fundamentals Certification, Microsoft - | Nov 2022 |

ACHIEVEMENTS AND HOBBIES

- Achievements:** Class Representative, active volunteer at SELESTA Fest.
- Hobbies:** Photography, Video Editing.
